

Fast Acting,

Low Dose

Joint Care

Cynatine® FLX

Cynatine® FLX is a revolutionary joint care ingredient comprised of Solubilized Keratin, a protein found naturally in the body. Cynatine® FLX supplements the body with bioavailable Keratin which aids in protecting and rebuilding damaged joints. While other joint care products require large dosages and multiple ingredients, Cynatine® FLX is effective as a standalone product at 500mg per day!

ROXLOR

Four Fold Action:

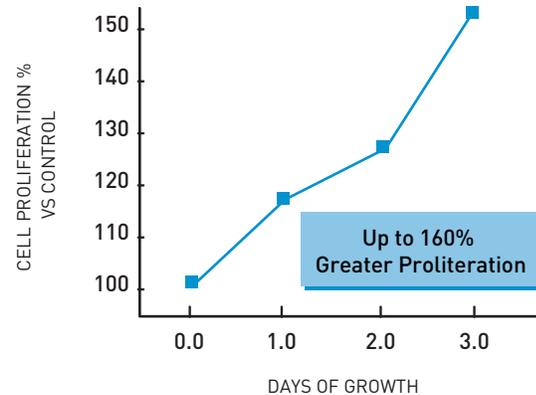

Cynatine Builds Joint Resilience by supplying the key building blocks and bioactive high sulfur precursors necessary for joint and tissue repair.

Cynatine Helps Reduce Inflammation by suppressing the inflammatory mediators associated with degradation of the joint.

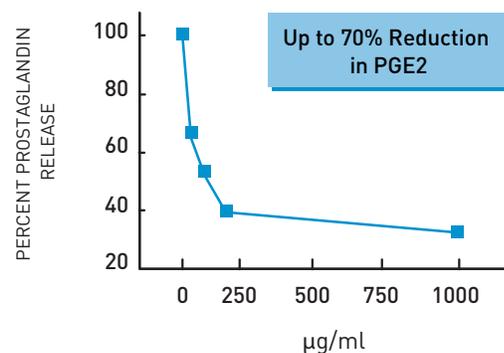

Cynatine Improves Mobility through its highly potent enzymatic activity which allows one molecule to quench millions of free radicals. It also increases production of superoxide dismutase (SOD) and glutathione.

Cynatine Protects the Joint through its intrinsic natural antioxidant activity. By increasing antioxidant defenses, it protects the joint from free radicals reducing oxidative stress. This reduces inflammatory response and leads to pain reduction and increased mobility.

CYNATINE FLX™ STIMULATES CELL PROLIFERATION

CYNATINE FLX™ INHIBITS PROSTAGLANDIN E2 PRODUCTION

Nutritional Information:

Protein: > 70%

Ash: < 30%

Labeling: Cynatine® FLX (Solubilized Keratin)
